

A Dream Set of e-Tools for the Teacher's e-Toolbox

A toolbox with the wrong tools is ineffective. The right choice of e-tools will enable the user to work efficiently and with great results.

What must the dream set e-tools for the teacher look like?

The e-tools in my dream e-toolbox must have the following features and should:

- ✓ Fully cover the CAPS, per grade, per subject, per term, per topic /skill /content area, per theme /week /topic.
- ✓ Work in both an online and offline environment, without losing its features.
- ✓ Save a lot of preparation time for the teacher. (The teacher should not be required to spend hours searching the net for the right content for tomorrow morning's lesson.)
- ✓ Link the DBE workbooks and a variety of textbooks through CAPS to standardize learning content.
- ✓ Standardize the implementation timelines according to CAPS.
- ✓ Be FUN in the classroom for both the teachers and learners, using interactive content, animations, videos, sound, colourful displays, and characters the learners can relate to.
- ✓ Focus on reading skills throughout the curriculum to interest learners.
- ✓ Accommodate translations into all SA languages.
- ✓ Benefit ALL children in an e-inclusion setup where no child is left behind.

You may ask: *"Is such an e-toolset available with ALL the above features?"*

"Yes, it is available."

“Where can I get it for my classroom?”

“Easy, click on the link below and have a look at an introduction of Future-Fun CAPS, the dream e-tool for your e-toolbox.

<https://www.youtube.com/watch?v=DI754cy3JI0>

In a future article I will discuss this amazing e-toolset, produced in South-Africa for South-African schools: *Future-Fun CAPS*.
